

# PRASHANT KANDAPAL

parthkd.coder@gmail.com | +91-6398101335 | linkedin.com/in/prashant-kandpal-1b4375282

## Professional Summary

Proactive final-year B.Tech. student with strong foundations in Data Structures, C++, and Web Development using HTML, CSS, JavaScript, and React. Passionate about building practical, user-focused applications and continuously expanding technical skills to solve real-world problems.

## Projects

### Intelli-Migrate — AI-Driven ETL Automation Platform

[github.com/thisisdvnsh-thkr/new-intelli-migrate](https://github.com/thisisdvnsh-thkr/new-intelli-migrate)

Python · sentence-transformers · Pandas · FastAPI · Multi-Agent Architecture

- Contributed as NLP Agent Developer in a 5-agent ETL platform automating transformation of unstructured data (JSON, CSV, XML) into deployment-ready SQL databases.
- Built Agent 2 (NLP Schema Mapper) using sentence-transformers to semantically map inconsistent column names to standard SQL schema with 91%+ accuracy.

### Access Anomaly Tracker — ML-Powered Login Detection

[github.com/kd-prashant/access-anomaly-tracker](https://github.com/kd-prashant/access-anomaly-tracker)

React · JavaScript · HTML · CSS · Git

- Designed overall system architecture defining how the React frontend, backend API, database, and ML model connect as a unified scalable pipeline.
- Built and integrated the React frontend dashboard displaying real-time login logs, anomaly scores, and threat activity charts for security monitoring.

### Niramay AI — Agricultural Crop Health Diagnostic Platform

[github.com/kd-prashant/Niramay-AI](https://github.com/kd-prashant/Niramay-AI)

HTML · CSS · JavaScript · React · OpenWeatherMap API

- Independently developed the complete frontend of an AI-powered crop disease diagnostic platform making health assessment accessible to farmers.
- Built a fully responsive bilingual (English and Hindi) React interface with real-time environmental tracking using OpenWeatherMap API.

## Education

|             |                                                                                                     |        |
|-------------|-----------------------------------------------------------------------------------------------------|--------|
| 2022 – 2026 | <b>B.Tech. in Artificial Intelligence &amp; Machine Learning</b>   Uttarakhand Technical University |        |
| 2021        | <b>12th (Senior Secondary)</b>   Campus School, Pantnagar                                           | 86.00% |
| 2019        | <b>10th (Secondary)</b>   Campus School, Pantnagar                                                  | 92.40% |

## Technical Skills

**Languages & Core Concept:** C++, JavaScript, Python (Basic), Data Structures & Algorithms, Object-Oriented Programming

**Web Development:** HTML, CSS, React

**Database & Tools:** MySQL, Git, GitHub, Numpy, Pandas

## Virtual Internships

### C++ Programming Intern

CodSoft · Virtual · 4 weeks

Aug 2024 – Sep 2024

- Completed structured C++ programming tasks covering core language concepts, OOP principles, and problem-solving challenges.
- Submitted assignments focused on writing clean, efficient code with proper logic implementation.

### Artificial Intelligence Intern

PRASUNET · Virtual · 1 month

Sep 2025 – Oct 2025

- Completed assigned AI-focused coding tasks and programming challenges as part of an educational virtual internship programme.
- Gained hands-on exposure to AI concepts through structured task-based learning and submission.

## Achievements

- GATE 2026 Qualified — CS/IT, demonstrating strong command over core computer science concepts.
- DSA: Solved 200+ problems across LeetCode, GFG, CodeChef, and Codeforces.
