PROFESSIONAL SUMMARY

Final-year B.Tech. student in Artificial Intelligence & Machine Learning (Uttarakhand Technical University), GATE 2026 qualified (CS/IT). Experienced in building full-stack, ML-integrated web applications using React, FastAPI/Node.js, and relational databases (MySQL/PostgreSQL). Strong foundation in Data Structures & Algorithms (200+ problems solved) and system design, with a track record of independently designing and shipping multi-tiered projects — including a multi-agent ETL pipeline and an ML-powered anomaly-detection platform — and translating ambiguous, real-world problems into working, scalable applications.

PROJECTS

Intelli-Migrate — AI-Driven ETL Automation Platform

Python · sentence-transformers · Pandas · FastAPI · Multi-Agent Architecture · MySQL | github.com/thisisdvnsh-thkr/new-intelli-migrate

- Contributed as NLP Agent Developer on a distributed, 5-agent ETL pipeline that transforms unstructured data (JSON, CSV, XML) into deployment-ready relational SQL databases.
- Built Agent 2 (NLP Schema Mapper) using sentence-transformers to semantically map inconsistent column names onto a standardized relational schema, achieving 91%+ mapping accuracy.

Access Anomaly Tracker — ML-Powered Login Detection

React · JavaScript · HTML · CSS · Git | github.com/kd-prashant/access-anomaly-tracker

- Designed the end-to-end, multi-tiered system architecture connecting a React frontend, backend API, database, and ML anomaly-detection model into a single scalable pipeline.
- Built and integrated the React dashboard visualizing real-time login logs, anomaly scores, and threat activity for security monitoring.

Niramay AI — Agricultural Crop Health Diagnostic Platform

HTML · CSS · JavaScript · React · OpenWeatherMap API | github.com/kd-prashant/Niramay-AI

- Independently built the complete frontend of an AI-powered crop-disease diagnostic platform — a fully responsive, bilingual (English/Hindi) React interface with real-time environmental tracking via the OpenWeatherMap API.
- Translated an ambiguous, farmer-facing problem into an accessible, production-ready product interface.

EDUCATION

B.Tech. in Artificial Intelligence & Machine Learning — Uttarakhand Technical University	2022 – 2026
12th (Senior Secondary), Campus School, Pantnagar — 86.00%	2021
10th (Secondary), Campus School, Pantnagar — 92.40%	2019

TECHNICAL SKILLS

- Algorithms & Core CS: Data Structures & Algorithms, OOPs, System Design, C++, Python, JavaScript, Machine Learning, Generative AI
- Distributed & Web Systems: React, Next.js, Node.js, Express.js, TypeScript, Blockchain, Postman
- Databases: MySQL, PostgreSQL, MongoDB
- Data Science & ML Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, sentence-transformers, Matplotlib
- Tools: Git/GitHub

VIRTUAL INTERNSHIPS

C++ Programming Intern — CodSoft (Virtual, 4 weeks)

Aug – Sep 2024

- Completed structured C++ tasks covering core language concepts, OOP principles, and problem-solving with clean, efficient implementations.

Artificial Intelligence Intern — PRASUNET (Virtual, 1 month)

Sep – Oct 2025

- Completed AI-focused coding tasks and programming challenges through structured, task-based learning.

ACHIEVEMENTS

- GATE 2026 Qualified — CS/IT, demonstrating strong command over core computer science concepts.
- Solved 200+ Data Structures & Algorithms problems across LeetCode, GeeksforGeeks, CodeChef, and Codeforces.
- TCS-NQT Qualified.
